<b>Description</b>	
<p>After installing v0.13 on debian jessie redmine 3.03 the product worked just fine. However, once I created a custom field story points to link to the settings, it stopped working. I would get a</p> <p>"Page not found</p> <p>The page you were trying to access doesn't exist or has been removed."</p> <p>So I uninstalled the plugin and tried to reinstall without the story points field...no matter what I get the page not found error on the settings page and on the sprint. If there is no data entered in the sprint the page will show however once there is an anything loaded in the sprint, it shows page not found.</p> <p>Lastly, the setting in the project where there was a tab called sprint is now missing completely on reinstall</p>
