

Scrum - Defect #1008

install fail on redmine 3.0.0/3.0.1

2015-03-17 10:27 - sheng wu

Status: New	
Priority: High	
Category:	
Target version:	
Source: Testing	Blocked: No
Detected on version: Scrum v0.9.1	Alone:
Description 1 cd redmine-3.0.0/plugins 2 tar xzvf ~/scrum v0.9.1.tar.gz 3 mv scrum\ v0.9.1 scrum 4 budle exec rake redmine:plugins:migrate error a lot... so, i just removed it.	

History

#1 - 2015-05-31 21:11 - Emilio González Montaña

- Target version deleted (Scrum v0.11.0)

#2 - 2015-07-06 13:54 - Natalia Velychko

Hi Emilio,

Has it been solved?

It's impossible to install Scrum plugin on 3.0.x version, Redmine is crushed straight after installation.

#3 - 2015-07-17 21:50 - Leonardo Sena

I had to run the following commands to be able to migrate my plugins:

bundle exec rake redmine:plugins:migrate (which you already did) and then:

- `ruby bin/rake redmine:pplugins RAILS_ENV=production`

#4 - 2015-07-28 15:55 - Michael Kimsal

failing on 3.0.3 as well

i keep wanting to like this plugin, but it seems plagued with problems (a year ago it was javascript drag/drop issues that no one could seem to replicate, but everyone had) and now installation problems. will try again on next release.

to try this, grab a digitalocean "redmine" install (I'm using their one-click install version) and then grabbed 0.11.1, untarred in /srv/redmine/plugins, did the rake, some DB stuff was done, but it never shows up in 'plugins' area of redmine installation.

Also, i'll be happy to grant access to my install (or a new one) for anyone that wants to try to troubleshoot this - you can have full root if you need to diagnose and fix this.
