Has no sense for me, from my point of view there is no need to use start and end date fields in PBIs or tasks because they're implemented inside an Sprint, and an Sprint has start and end date (usually one or two weeks long), so many dates are redundant' do extra effort for the team to update them.

#2 - 2015-08-20 22:38 - Emilio González Montaña

- Status changed from New to Rejected
- Sprint set to Product backlog
- Position changed from 78 to 12
