Scrum - Defect #1126

Scrum Board bad positioning

2015-11-05 19:48 - Anonymous

Status:	New			
Priority:	High			
Category:				
Target version:				
Source:	Development		**Blocked:**	No
Detected on version:	Scrum v0.10.0		**Alone:**	

Description

Hi,
i'm using Redmine 2.4.2.stable.
After installing 0.10 version of plugin, nothing showed up correctly. I had to create a folder plugin_assets/scrum in my www directory copying all assets of plugin manually because my browser had a lot of 404.
After this fix, everything went fine, i manage to see the scrum board.

However,I'm still having an issue: my product backlog items do not appear in the right position in the Scrum board. They always stay in "Product Backlog item" coulumn if i switched the item in "In progress" status.
How could this happen? Thank you in advance

Hi, Mario.

Do you know - did fixed this issue about not changes task column position in Sprint board?
Thanks
