

Scrum - User story #1141

Sprint estimated effort auto-fill

2016-02-18 23:32 - Vito Marolda

Status: New	
Priority: Normal	
Category:	
Target version:	
Blocked: No	Alone:
Description A simple function to fill all the days of the sprint estimated effort (for one developer) with the same value. Default: initial pending effort (assigned to the user) / number of days, but editable. e.g.: <ul style="list-style-type: none">• the sprint starts with 80 hours pending effort (assigned to the user).• the sprint takes 25 days (including Saturdays and Sundays, it doesn't matter)• the "auto-fill" field will offer 3.2 as a default, but it will be editable• the "auto-fill" button will fill all the days with the value. In this way, we will have a nice default straight descending line sprint estimated effort in no time! :) If calculating the initial pending effort for every user is too difficult, then total pending effort will be ok.
