<b>Description</b>	
Hello there,	
Im using windows and the bitnami stack. i unzipped the folder twice, renamed it to redmine_localizable_0.4.0 and installed the plugin according to redmine docu with bundle exec rake redmine:plugins:migrate RAILS_ENV=production as admin i see the plugin but i cannot configure it cause error 404 comes up.	
can someone help please

Sorry  
i got it  
problem was i migrated the plugin which is not necessary
