

## Scrum - User story #1197

### Hide trackers that are not present in a project sprint

2016-09-20 21:15 - Florian Delizy

<b>Status:</b>	Rejected	
<b>Priority:</b>	Normal	
<b>Category:</b>	Sprint board	
<b>Target version:</b>		
<b>Blocked:</b>	No	<b>Alone:</b>
<b>Description</b>		
<p>Currently when defining several tasks types (several trackers), if a tracker is not present in a project, it is still shown in the '+' buttons on the user story in the springboard.</p> <p>For instance A, B, C are trackers for tasks, P1 is a project having A and B (but not C), in the springboard, I still can add a task from C tracker to the userstory, (but actually adding an issue will trigger an error).</p> <p>Hiding that button would be quite nice...</p> <p>Also having a way to decide what tracker the new task issue should go to in the issue editor would be nice.</p>		

#### History

- Status changed from New to Rejected

I cannot reproduce this error, I tested on this Redmine (& a development version) but everything seems to work (latest plugin version 0.15.0).

Please add another PBI for:

Also having a way to decide what tracker the new task issue should go to in the issue editor would be nice.
