

Scrum - Defect #1247

Unable to drag and drop at sprint board

2016-11-15 15:09 - juan gimeno

Status: Rejected	
Priority: Normal	
Category: Sprint board	
Target version:	
Source: Development	Blocked: No
Detected on version: Scrum v0.16.0	Alone:
Description Is impossible to switch column from the sprint board "features", so the "feature" gets sealed to the column named "product backlog items". Dragging the "post-it" results in dragging the whole row. I just can drag and drop the complete row to change the order of rows. Even editing the "sprint feature" and setting it to "new", "in progress", "ready for test" or "closed" does not show it up where it should.

Even editing the "sprint feature" and setting it to "new", "in progress", "ready for test" or "closed" does not show it up where it should.

I see that just Tasks or Bugs associated to this feature can be added and then they appear in the New column, then those can be moved to the other columns.

Great.

But, what if in next sprints you get bugs related to features defined in the past? What is here the correct workflow?

- a) Create a new feature in the actual sprint and call it "Bugs from the past" and assign this bug to this feature.
- b) Reassign the old feature to the actual sprint and assign this bug to this feature.

#2 - 2016-11-15 18:09 - Emilio González Montaña

- Status changed from New to Rejected

Reassign old feature to new Sprint (if you click on PBI edit icon you will find a link to move PBI to the last Sprint), then all the still open child tasks will move automatically, closed child tasks will remain in old Sprint, so they will not affect new Sprint burndown.

#3 - 2016-11-15 18:12 - juan gimeno

Perfect, thanks a lot!

Also congrats for the work done!
