

Scrum - Defect #1283

Start date is not set automatically on new task creation

2017-01-05 22:46 - Angelinsky7 Angelinsky7

Status: New	
Priority: Low	
Category: Sprint board	
Target version:	
Source: Development	Blocked: No
Detected on version: Scrum v0.16.2	Alone:
Description	
<p>When we create a new subtask via the sprint page the start date is not set. Now, in redmine, there is an option to automatically set the start date, so if we use the create new sub task action from redmine, there is a start date.</p> <p>One more time a naive and easy way to correct this: update the <code>app/controllers/sprints_controller.rb</code> file and edit the <code>change_task_status</code> action :</p> <pre>def change_task_status @issue = Issue.find(params[:task].match(/^task_(\d+)\$/)[1].to_i) @old_status = @issue.status @issue.init_journal(User.current) @issue.status = IssueStatus.find(params[:status].to_i) raise 'New status is not allowed' unless @issue.new_statuses_allowed_to.include?(@issue.status)) @issue.start_date = Date.today if @issue.status != @old_status and (@issue.start_date.nil?) @issue.save! respond_to do format format.js { render 'scrum/update_task' } end end</pre> <p>if we want to be completely correct we should add this to ensure that this option is only use when the redmine option is set. (or add a scrum plugin option ???)</p> <pre>Setting.default_issue_start_date_to_creation_date?</pre>

- File `scrum_start_date_16.2.patch` added

i've been thinking and change a little bit how this proposition could work.
i've added two new setting : `status_id_set_startdate` and `status_id_set_enddate` (for due date)
so when a change occurs if those settings are set and the date is null the update are done.
the patch file if someone want it.
