Multi-team support in backlog burndown chart

2017-03-03 09:43 - Hiroshi Miura

Status: New	
Priority: Normal	
Category: Product backlog burndown	
Target version:	
Blocked: No	Alone:
Description	
<p>Here is a bug report for backlog burndown chart.</p> <p>Nexus is a framework to scaling project with several scrum teams. We are working with 5 scrum teams for a project currently.</p> <p>Keys of nexus are as follows:</p> <ul style="list-style-type: none">• Single backlog for teams.• Individual kanbans for each teams.• Integrated backlog burndown chart and release plan for a project.• Individual sprint burndown chart. <p>To support these behaviors, we can use redmine and scrum plugin with following settings;</p> <ul style="list-style-type: none">• Use single project.• Use single burndown board for all teams.• assign sprint name for each team such as sprint5_teamA, sprint5_teamB• each team works with each sprint board.• We can see burndown chat for each team's sprint. <p>Now we will see broken backlog burndown chart.</p> <p>It may process tickets for each sprint as a single team's individual sprint. but nexus setup, there are concurrent sprint by several teams so it should consolidate these to a single iteration.</p> <p>Are there any better way to support Nexus with redmine? Or it may be a bug/new feature request for backlog burndown chart.</p>	

History

#1 - 2017-03-03 10:10 - Emilio González Montaña

- Subject changed from backlog burndown chart broken when Nexus Framework setup. to Multi-team support in backlog burndown chart
- Category set to Product backlog burndown
- Sprint set to Product backlog

This could be a great feature of the plugin, but it seems to be a difficult one (I think we can do more than just allowing multi-team in the PB backlog...).

I will have to think about it... any chance to get economical support via Patreon to implement this feature?
