

## Advanced roadmap - Feature #1325

### Assign tickets to Milestone

2017-03-29 07:13 - Artur H

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Low	<b>Due date:</b>	
<b>Assignee:</b>	Emilio González Montaña	<b>% Done:</b>	0%
<b>Category:</b>	Milestones	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
<p>I would like to use Milestone for Release planning. So it would be very useful to be able to assign tickets to a Milestone.</p> <p>The way I see it working is:</p> <ol style="list-style-type: none"><li>1. I plan for next big product release which involves a few Redmine projects</li><li>2. I create a new Milestone for that (I call it Release) and create a set of "Features" for the release.</li><li>3. Now I create new version for each project involved and assign it to the Milestone</li><li>4. Now, within a project version I create subticket of Milestone features for implementing this feature within this project version</li><li>5. Then we could have a Spring in each project for a feature implementation.</li></ol> <p>Do you think it makes sense?</p>			

### History

#### #1 - 2017-05-19 20:25 - Emilio González Montaña

It's not feasible with current plugin design. At least without starting from scratch...

Just an idea, did you consider to group release/milestone features under a version? from my understanding then you could still create other subtickets on other projects and versions as you described. Does it makes any sense for you?

#### #2 - 2017-05-20 00:23 - Artur H

Yes, this is how we do it right now. We have a dedicated project for releases planning. In the project we create a new Milestone and a new Version plus we assign to the milestone Versions from other projects which are related.
