

## Scrum - Defect #1336

### Remove Sprint and Backlog

2017-04-06 09:38 - Artur H

<b>Status:</b> Resolved	
<b>Priority:</b> Normal	
<b>Category:</b> Issues list & form	
<b>Target version:</b> Scrum v0.17.0	
<b>Source:</b> Customer	<b>Blocked:</b> No
<b>Detected on version:</b> Scrum v0.17.0	<b>Alone:</b>
<b>Description</b> There seem to be no way to remove created Spring or Backlog from the Redline installation. Even, after disabling Scrum module for a project, there is still default Sprint for each ticket.	
<b>Subtasks:</b> To do # 1372: Fix the case <span style="float: right;"><b>Resolved</b></span>	

### History

#### #1 - 2017-04-06 10:14 - Emilio González Montaña

- Tracker changed from User story to Defect
- Category changed from General to Issues list & form
- Target version set to Scrum v0.17.0
- Sprint set to Sprint 33
- Source set to Customer
- Detected on version set to Scrum v0.17.0

I changed to a defect, please review the **Detected on version** field...

I have detected this for:

- Issue form & issue view.
- Issue list (it's present as filter, column and contextual menu).
- Bulk edit.

Pending effort field is also present on this situation and it should not.

Please tell me if you found any other place.

I have to review this stuff with the sharing Sprint features, cause it could happen that a non Scrum project needs to render some Scrum links on issues if any parent Scrum project shares Sprints/PBs with child non Scrum projects...

#### #3 - 2017-04-07 01:54 - Artur H

I have only seen this on the issue form.

#### #4 - 2017-04-24 07:48 - Emilio González Montaña

- Sprint changed from Sprint 33 to Sprint 34

#### #5 - 2017-05-05 12:03 - Emilio González Montaña

- Status changed from In progress to Resolved

Now it will be disabled (unless the project has a parent with shared Sprints).
