

Scrum - Defect #1393

Cannot save plugin settings

2017-07-27 21:40 - Angelinsky7 Angelinsky7

Status: Rejected	
Priority: Low	
Category: Project settings	
Target version:	
Source: Development	Blocked: No
Detected on version: Scrum v0.17.0	Alone: No
Description For a strange reason with the new version of Redmine, if i try to save some settings, i lost all the plugin settings.	
Related issues: Is duplicate of Scrum - Defect #1381: Scrum plugin doesn't work with redmine ... Resolved	

History

#1 - 2017-08-30 20:40 - Angelinsky7 Angelinsky7

after searching for a while, i found out that was the .to_s in the settings class that was missing...
for a strange reason when i did apply the 0.17 update the change was not applied.
so we can close this false issue.
thanks again

#2 - 2017-08-31 15:51 - Jürgen Schreier

Can you please elaborate more?
I tried to install 0.17.0 on Redmine 3.4.2 and every setting I try to apply is lost after saving.

Environment:
Redmine version 3.4.2.stable.16952
Ruby version 2.3.3-p222 (2016-11-21) [x86_64-linux]
Rails version 4.2.8
Environment production
Database adapter Mysql2
SCM:
Subversion 1.8.10
Git 2.1.4
Filesystem
Redmine plugins:
recurring_tasks 1.6.0
redmine_checklists 3.1.5
redmine_create_git 0.2.0
redmine_github_hook 2.1.0
redmine_image_clipboard_paste 3.3.0
redmine_timesheet_plugin 0.7.0
reminderemails 0.0.1
scrum 0.17.0

if you look into the settings files : <https://redmine.ociotec.com/projects/redmine-plugin-scrum/repository/revisions/master/entry/lib/scrum/setting.rb>
@line 177

before all the call were :

```
::Setting.plugin_scrum[setting]
```

and now it should be

```
::Setting.plugin_scrum[setting.to_s]
```

like in this example :

```

def self.setting_or_default(setting)

  ::Setting.plugin_scrum[setting.to_s] || Redmine::Plugin::registered_plugins[:scrum].settings[:default][
setting]

end

def self.setting_or_default_boolean(setting)

  setting_or_default(setting) == '1'

end

def self.setting_or_default_integer(setting, options = {})

  value = setting_or_default(setting).to_i

  value = options[:min] if options[:min] and value < options[:min]

  value = options[:max] if options[:max] and value > options[:max]

  value

end

def self.collect_ids(setting)

  (::Setting.plugin_scrum[setting.to_s] || []).collect{|value| value.to_i}

end

def self.collect(setting)

  (::Setting.plugin_scrum[setting.to_s] || [])

end

```

I don't know why in the source code it's like that and not in the zip file but.... you could always change it by yourself (be aware that there is more change to do in that file)

Hello Angelinsky7,

thanks for elaborating this for me.

That actually helped me alot - only problem left here is the story points.

Here using your suggested procdedere doesn't solve the problem.

I still keep getting this error: "Story points custom field" plugin setting isn't configured, you can configure it in Administration » Plugins » Scrum Redmine plugin

Did you do anything special to get this also working?

best regards

Jürgen

did you change that ? @line 66 from latest file

```
%w(blocked_custom_field_id
    simple_pbi_custom_field_id
    story_points_custom_field_id).each do |setting|
  src = <<-END_SRC
  def self.#{setting}
    ::Setting.plugin_scrum[:#{setting}.to_s]
  end
END_SRC
class_eval src, __FILE__, __LINE__
end
```

#6 - 2017-09-06 08:55 - Jürgen Schreier

Jepp I did this. But unfortunately I made a syntax error:
I used it like this (gave no errors though):
`::Setting.plugin_scrum[:#{setting.to_s}]`

So thanks alot for your support - it works now!

Hello Angelinsky7,

did you happen to see this here:
<https://redmine.ociotec.com/issues/1381#change-2523>

I would really appreciate your feedback on my question there as well.

best

Jürgen

- *Status changed from New to Rejected*

Duplicated of [#1381](#).

BTW the new version already released fix this problem.

#9 - 2017-10-16 21:13 - Emilio González Montaña

- *Is duplicate of Defect #1381: Scrum plugin doesn't work with redmine 3.4.x added*
