Scrum - User story #1538

As a User, creation of sprints can act as a Roadmap-Target Version rather than a new field of its own.

Description

Hi,

1. Me being a process analyst for my company which uses Scrum 0.18.0, I want the plugin to have a feature to link Sprints with Target Version.

2. This feature would then be used to help maintain release plans in the Roadmap section then.

   1. Sprint burndown calculations are then not getting affected by it.   # Product Backlog User Stories can then be directly be moved to Target Versions in Roadmap
      section itself.

3. Employing the above features will definitely increase code reusability which will benefit the user facing error challenges.

History

#1 - 2018-04-21 16:16 - Emilio González Montaña

- Alone set to No

- Status changed from New to Rejected

- Tracker changed from Technical debt to User story

This is not the way I understand Scrum, for me a separated field was the main purpose to start this plugin, there are othere plugins based on you idea.

#2 - 2018-04-21 16:16 - Emilio González Montaña

- Target version deleted (Scrum v0.19.0)
