

Scrum - Defect #1539

The page is not updated after move a PBI to different backlog

2018-02-24 03:24 - mao zhigang

Status:	New		
Priority:	Normal		
Category:	Product backlog		
Target version:			
Source:	Customer	Blocked:	No
Detected on version:	Scrum v0.18.1	Alone:	No

Description

I have two backlogs: Product Backlog and PIR

When moving Defect #30 from Product Backlog to PIR, #30 is still in the Product backlog page. It is corrected after clicking F5 to refresh the page.

The screenshot shows two parts of the Jira interface. On the left is a sidebar with a 'Product backlog' section containing several cards, including '#30: Defect Three'. On the right is a detailed view of 'Defect #30'. The form fields are: Subject: Defect Three; Status: New; Priority: Urgent; Category: Post; Target version: demo_project 1.0; % Done: 0%; Blocked: ; Story Point: 2.0; Detected On Version: demo_project 2.0. At the top right of the detailed view, there are three buttons: 'Move to last Sprint', 'Move to PIR', and 'Move to Product Backlog'. A red arrow points to the 'Move to PIR' button.
