

Advanced roadmap - Feature #1540

Child tickets not visible in roadmap

2018-02-25 10:51 - Mathias Buder

Status: New	Start date:

Category: Roadmap	Estimated time: 0.00 hour
Target version:	

Description

We use redmine in our company and host all our work items with it (software, hardware as well as mechanical designs). Each of these work items needs its own version to have tickets linked to it. So the Advanced roadmap plugin was just what I was looking for to have multiple versions grouped into one milestone. Perfect!

We use a parent-child ticket structure like:

- Open Point 1
 - Task 1
 - Task 2
 - Task 3

The Open Point is a general item to collect all information about a topic and group necessary tasks for it. The OP shall NOT be linked to a version or/and milestone but to an affected version if required.

Now if I link a task to a target version (which will then link to a milestone automatically) I don't see them listed up in the roadmap but I can still see that they have been linked to the version (tickets under the version's progress bar).
If I link the parent OP to that version too then I can see both (OP and Task).

I've tried this with the default roadmap and didn't see any issue here.

History

#1 - 2018-02-25 10:53 - Mathias Buder

Here you can see that two tickets have been assigned to this version but none of them is listed up below.

Mechanical release 0.1.0

Due in 26 days (2018-03-23)

% Project 100%

Due in 27.00 hours / 3.38 days / 0.68 weeks

#2 - 2018-02-25 10:58 - Mathias Buder

In case I link the parent OP to this version those two get listed up below then.

Due in 26 days (2018-03-23)

% Project **100%**

Due in **27.00 hours / 3.38 days / 0.68 weeks**

Related tickets

Ticket	Estimated time	Spent time	% Done	Due in
Open Point #17: eMail test ticket grbv srsdf sdb		0.00	70%	0.00
Task #23: Some test ticket		0.00	70%	0.00
Total	6.00	3.00	10%	27.00

#3 - 2018-02-25 23:14 - Emilio González Montaña

- Redmine version deleted (Redmine 3.3.1)
- Detected on version deleted (Advanced roadmap 0.12.0)
- Source deleted (Customer)
- Tracker changed from Error to Feature

Hi, the plugin expects all issues to be under the target version... that's the way the plugin was designed.

If your company is interested in develop this feature Patreon support could be an option (or direct PayPal transfer).
