

Scrum - Defect #1543

Cannot drag&drop task after editing using pop-up

2018-04-06 08:57 - Piotr Grondziowski

Status:	New		
Priority:	Normal		
Category:	Sprint board		
Target version:			
Source:	Development	Blocked:	No
Detected on version:	Scrum v0.18.1	Alone:	No

Description

To reproduce:

1. Open or refresh sprint board with at least one PBI having at least one task: drag&drop of the task works normally
2. Click pen icon of the task, which opens pop-up to edit it: "Loading" blinks on the screen, pop-up window is not visible, d&d still works
3. Click pen icon once again: "Loading" blinks and pop-up window is visible
4. Press "Edit" button: pop-up window is closed, d&d is not possible, text on post-it is selected instead (if you press "Cancel" button in pop-up window, d&d will be still possible)
5. Refreshing sprint board brings back d&d

History

#1 - 2018-04-23 07:27 - Piotr Grondziowski

- File #1543.log added

Browser (Chrome) console log is empty.

#2 - 2022-11-28 07:22 - Piotr Grondziowski

After plugins clean and upgrade problem doesn't exist anymore. Could be another plugin influence.
