

Scrum - Defect #1554

Wrong calculation of hours per storypoints

2019-02-13 10:09 - Andreas Adelsberger

Status: New	
Priority: Normal	
Category: General stats	
Target version:	
Source: Development	Blocked: No
Detected on version: Scrum v0.18.1	Alone: No
Description	
<p>Hi, hours per story points are calculated as a sum of the child tasks. Hours on the issue directly are not added. So if hours are tracked on the user story directly the calculation is wrong.</p> <p>How about simply adding them like this:</p> <pre>diff --git a/lib/scrum/issue_patch.rb b/lib/scrum/issue_patch.rb index f20e2ce..6506dce 100644 --- a/lib/scrum/issue_patch.rb +++ b/lib/scrum/issue_patch.rb @@ -320,7 +320,7 @@ module Scrum def total_time if self.is_pbi? the_pending_effort = self.pending_effort_children - the_spent_hours = self.children.collect{ task task.spent_hours}.compact.sum + the_spent_hours = self.spent_hours + self.children.collect{ task task.spent_hours}.compact.sum elsif self.is_task? the_pending_effort = self.pending_effort the_spent_hours = self.spent_hours</pre> <p>This works in my case</p> <p>Best regards,</p>
