Revision 725 - 2009-09-25 11:29 - Emilio González Montaña

#197

- Patch the values getting.
- The problem was change the field type, for example, if a value was a date, and then a boolean, the real value was 2009-06-07 instead of 0 or 1; so some limits have been added:
 - Element types can't be deleted if there are documents using them.
 - Element fields assignation to element types can't be deleted if there are documentos using the element type.
 - Element fields can't be deleted if there are documents using them.
 - Element fields types can't be changed if there are documents using them.
