Description			
Hi,			
I use the last version 0.4.4 with Redmine 1.1.1. I did a migration Rddmine to 1.0.0 to 1.1.1. No problem with the new trackers. But when I want to the old issue trackers, I obtain this error message :			
ActionView::TemplateError (can't convert nil into Float) on line #53 of vendor/plugins/advanced_roadmap.0.4.0/app/views/issues/show.rhtml:

Do you have a idea to resolv this ?			
PS: Very good plugin !			
Best regards			
Yannick
