Assignee:	Emilio González Montaña	% Done:	100%
Category:	Roadmap	Estimated time:	0.00 hour
Target version:	Advanced roadmap 0.4.1	Redmine version:	
Source:			
Detected on version:			
Description			
The formula to calculate the values is wrong and produces wrong result.			
I have a project with 1 milestone and 1 version			
The version have 9 issues 4 of which are fixed			
And the result says that the completed percent = 100, which is wrong.			
The completed percentage should be like 44%			

History

The not fixed issues have estimated time?

The % is calculated based on time efforts, on spent time + estimated time, if the pending issues have 0 effort, the work is done for all the version on the fixed ones, so the 100% is correct. This plugin does this calculation on this way, if you want the simple calculation you can use the basic calculation of a base Redmine.

#2 - 2011-04-12 23:33 - Emilio González Montaña

- Subject changed from calculate_advance_info to Bad formula to calculate % on versions
- Due date set to 2011-04-12
- Status changed from New to Rejected
- Assignee set to Emilio González Montaña
- Target version set to Advanced roadmap 0.4.1
- % Done changed from 0 to 100
