Description

Hello,

with advanced roadmap version 0.5.1 it takes over 17 seconds for displaying the roadmap for a medium sized project (4 Versions, about 100 issues) .

I guess this is not the usual waiting time for it so it may be a bug.

Also the pie chart is not displayed at all. It might have something to do with that.

I have the same problem with the Advanced Roadmap plugin Redmine takes 40 seconds to generate the Roadmap page, without the plugin take 4 seconds aprox.
