

Scrum - Defect #840

Error plugin installation.

2014-07-20 20:19 - Regis MARTY

Status: Rejected	
Priority: Normal	
Category:	
Target version:	
Source: Development	Blocked: No
Detected on version: Scrum v0.7.0	Alone:
Description	
<p>I'm new on redmine/ruby/rails etc., I use turnkey Linux out of the box redmine configuration meaning that all things have been done by someone else and it works fine.</p> <p>I follow all the installation instructions but sadly during the plugin installation i've got the error "rake aborted !" du to "NameError : Uninitialized constant IssueQuery" in "init.rb" line 9.</p> <p>I've tried either V0.6.0 & V0.7.0 and the error is still here.</p> <p>I'm not an ruby/rails expert and it already takes me lot of time, I dont know what i can test and/or verify.</p> <p>Till now i suppress the "scrum" directory because my redmine dont run anymore after the erroneous plugin installation.</p> <p>Thank you for help.</p>	

History

#1 - 2014-07-21 17:43 - Regis MARTY

The plugin didnt test redmine version and mine was not up-to-date.

Then i upgraded my redmine version and finally installed scrum plugin.

#2 - 2014-09-12 22:04 - Richard Geddes

I'm also new to ruby and redmine. My setup:

- Ubuntu server 14.04,
- nginx 1.6,
- thin ruby app server 1.3,
- mysql-server 5.5,
- Redmine 2.5.1.

Installed all these with ubuntu package manager.

The plugin name is 'scrum', but the directory created by the tar file is 'scrum v0.7.0'.

This first time I tried installing this plugin, I just copied 'scrum v0.7.0' into the redmine plugins folder, migrated with 'rake redmine:plugins:migrate RAILS_ENV=production'. The result was an unusable redmine app... internal error

Out of curiosity, I changed the the directory to the name of the plugin ...

```
mv scrum\ v0.7.0 scrum
```

, and the plugn installed without issues.

#3 - 2016-06-21 13:23 - Emilio González Montaña

- Status changed from New to Rejected

- Blocked set to No

This is not a bug.
