

Scrum - Defect #904

sprint board task move does not be restricted by redmine default issue flow

2014-11-19 09:49 - an li

Status: New	
Priority: Normal	
Category:	
Target version:	
Source: Development	Blocked:
Detected on version: Scrum v0.7.1	Alone:
Description	
<p>Redmine default issue flow shall be the scrum sprint board drag rule, that means the flow will restrict drag issue from one status to another, e.g. closed issue cannot be drag to new or other status in sprint board.</p> <p>Now it does not work in scrum 0.7.x.</p> <p>I think you have fixed in the 0.8.0, but now 0.8.0 has some other issues which I cannot test about this defect. So I posted this defect again for a record.</p> <p>Thanks.</p>

And before scrum 0.8 fixes some bugs, can this defect be fixed in scrum 0.7.1?

I think scrum 0.8 VS scrum 0.7.1, there are big changes, and now we are using the basic features: sprint board, backlog for projects, so if there is possibility for fixing this issue both in 0.7.x and 0.8, that will be so nice.

Thanks, I have submitted many issues, so sorry for that, thanks for your great work for agile.
