Description	
<p>I've tried redmine 2.6 with scrum plugins 0.8.0. This installation is based on an older version of redmine (2.5) and scrum 0.6.0. Thus the database already exists. I've first have upgraded redmine to version 2.6 (Scrum plugins was disabled). This was done with success. When i tried to upgrade scrum to version 0.8.0. I've applied an bundle install and bundle exec rake redmine:plugins:migrate RAILS_ENV=production i then face the following error: ArgumentError: Unknown key: :order. Valid keys are: :class_name, :class, :foreign_key, :validate, :autosave, :table_name, :before_add, :after_add, :before_remove, :after_remove, :extend, :primary_key, :dependent, :as, :through, :source, :source_type, :inverse_of, :counter_cache, :join_table</p> <p>The Scrum plugins is no more able to run on my web site. I've temporarily disabled it. Thank you in advance for your help.</p> <p>the complete error log is just hereunder:</p> <ul style="list-style-type: none">• Invoke redmine:plugins:migrate (first_time)• Invoke environment (first_time)• Execute environment rake aborted!
